

## DIN 6900 - Screw and washer Assemblies (SEMS)

The use of Sems Units (screw and washer assemblies) to improve production speed and efficiency has become more popular in recent years. These parts are available in most standard machine screw sizes be they Slotted, Pozi or Torx Drive screws in Pan, Cheese, Countersunk or Raised Countersunk Head. Examples are shown above as well as the type of washers generally available. Please contact us for further details.
