

DIN7500 - Thread Forming Screws

Thread-forming screws according DIN 7500 can be driven into malleable materials without the need for tapping the mating thread. Parts are dimensionally in accordance with standard DIN screws, but with the added tri-lobular point to provide these added benefits. The example shown above is Form C to DIN7985

A	DIN84
B	DIN85
C	DIN7985
D	DIN933
E	DIN912
K	DIN963
L	DIN964
M	DIN965
N	DIN966
